

Optix Fax Watcher is a Macintosh application with accompanying Workflow route that facilitates the unattended processing of incoming fax files. The fax receiving capabilities of Mac OS X are used to receive faxes and place them into a watched folder. Faxes are saved as Optix Collection files when stored on the Optix Server.

## Optix Fax Watcher - Technotes

Optix Fax Watcher incorporates the following features:

- Monitors a user-specified folder and automatically processes incoming fax files.
- Incoming faxes are placed into a customizable Fax Receive workflow route.
